ACTIVITY 007

Slow Body Scan

Body Preparation & Posture

4 minutes / Quiet rehearsal space.

Identify one unnecessary area of tension before singing.

Notice in this order. Change only what feels useful.

1. *Pause and notice feet, knees, shoulders, hands, and face in that order; change only what feels comfortable.*

2. *Uncurl fingers and release a clenched face while breathing normally.*

3. *Sing a gentle three-note pattern, then name one physical change that made the task easier.*

DIRECTOR'S CUE

Singers can name a specific helpful adjustment without being told to 'relax everything'.

COMMON TRAP

Trying to release every muscle at once.

MAKE IT WORK

Offer a silent observation option; no one needs to explain personal sensations to the group.
