ACTIVITY 050

Rhythm Repair Loop

Rhythm & Pulse

6 minutes / One trouble spot plus the beat before it.

Practise a difficult rhythm without restarting an entire song.

Isolate, rest, and repeat slowly; then reconnect both joins.

1. Locate the first point where the group loses agreement and isolate only that small section.
2. Loop it three times slowly with a clear starting count and a rest between attempts.
3. Reconnect it to the preceding and following bars; restore speed only after two accurate joins.

DIRECTOR'S CUE

The transition remains accurate when surrounding music returns.

COMMON TRAP

Looping without a count-in or recovery gap.

MAKE IT WORK

Use spoken rhythm and remove pitches until the join works.
