ACTIVITY 116

Style Choice Laboratory

Creativity & Inspiration

8 minutes / A short original or licensed phrase.

Explore how interpretation changes when musical features change.

Change articulation and pulse deliberately; choose what supports the text.

1. *Sing the phrase once with connected notes and a gentle, flowing pulse.*
2. *Repeat with lighter separated articulation and a clearer beat, without imitating a cultural style you have not studied.*
3. *Choose the features that best support the text and name the actual changes made.*

DIRECTOR'S CUE

Singers describe concrete musical choices instead of relying on stereotypes.

COMMON TRAP

Naming a cultural style instead of musical features.

MAKE IT WORK

Work in speech and rhythm if the melodic version is too demanding.
